RE: Quil Ceda Village Treated Effluent Infiltration System: Inventory and Assessment for Rule Re-authorization and amendment (Village & EPA Manager meeting June 16, 2006)

Mr. Moon,

The Consolidated Borough of Quil Ceda Village hereby submits an Inventory and Assessment for Rule Authorization to re-authorize and amend the underground injection control facility for the water treatment plant in Quil Ceda Village as authorized in 2003 under 40 CFR 144 and 146. The system is a Class V injection well as defined by regulation. We understand this project is consistent with other Class V projects in Region X. EPA form 7520-16 with project definition and support data are included with this letter.

Thank you for participating in this important Village program to find safe, effective methods to constructively study the re-use of water to enhance our natural resources. Please refer questions to our staff manager (McKinsey, 360-654-2620).

Sincerely,

T. McKinsey
Quil Ceda Village
Acting General Manager
